COMMENTS ON EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Dear Sir:

- 1) Referring to item 6 of the Detailed Action enclosed with the Notice of Allowance of March 8, 2006, applicant has the following comments on the Examiner's Statement of Reasons for Allowance.
- 2) In addition to being patentable over the closest prior art references identified by the Examiner, present independent claims 15 and 27 are also patentable over a combined consideration of all the prior art references of record, because the prior art references do not disclose and would not have suggested the features of claim 15, and the features of claim 27, respectively.
- 3) The Examiner indicates that "above claims require that there are an evaluation device, and retardation means for influencing the vehicle longitudinal speed." That statement omits an important alternative recited in present apparatus claim 27, namely that there are "retardation means (50) and/or forward drive means (51) for influencing the vehicle longitudinal speed". In other words, it is not necessarily "retardation means" but may alternatively or additionally be "forward drive means" for influencing the vehicle longitudinal speed. It is thus the retardation means and/or the forward drive means that can be activated independently of the driver.

4) Furthermore, method claim 15 does not recite and is not limited by "an evaluation device" or "retardation means and/or forward drive means". Instead, method claim 15, recites the method feature of "the vehicle longitudinal speed (v) being influenced independently of the driver ..." without reciting or being limited to apparatus elements such as retardation means and/or forward drive means.

Respectfully submitted  
Eckart FISCHER et al. - Applicant
